Arts & Science Council

COMMUNITY IMPACT PROJECT SNAPSHOT
DELIVERED BY HYLAINE

Ensuring access to an excellent, relevant, and sustainable cultural community

Problem: Arts & Science Council (ASC) employees face inefficiencies due to slow internet speed, old hardware and challenges in working remotely.

Solution: Apparo matched ASC to a volunteer team from Hylaine to help them plan for optimized use of technology upon their office relocation. Volunteer Yash Sharma conducted extensive interviews to understand needs, assessed the current state of ASC and provided a detailed, recommended tech plan.

Nonprofit Team: Bonnie Carter, Toni Freeman

Volunteer Team: Adam Boitnott, Yash Sharma

A Clear Path to Achieving Organizational Goals

"*Apparo and our Hylaine volunteer helped us build a framework to prioritize how to move forward with technology. This makes our challenges less overwhelming. We have a clear way to reach our goals and give our staff what they need to be most productive. This project has been a great gift to us, far exceeding our expectations.*"
– Toni Freeman, Executive VP, Community Engagement, Arts & Science Council

Outcomes + Community Impact
Implementation of Tech Plan will enable:

- Ability to access files/systems while working remotely will expand staff ability to serve directly in communities and increase overall job satisfaction
- Improved internet speed and upgraded hardware will improve operational efficiencies across the organization
- Areas of potential risk (older hardware/operating systems) will be addressed

Powerful Volunteer Experience

"*I had an excellent time working on this project with these brilliant people. It has been a great opportunity to use my unique skills to help the community. Giving back to the larger community is an important part of my personal goals and working on this project has helped me to fulfill them.*"
- Yash Sharma, Project Volunteer, Hylaine
