

Impact Update!

Restore Global + Jabian Consulting

COMMUNITY IMPACT PROJECT 6 -MONTH FOLLOW-UP
PROJECT SPONSORED BY BANK OF AMERICA + DELIVERED BY JABIAN

Helping every nonprofit to grow and serve others

Problem: Experiencing exponential growth, Restore Global needed an assessment and recommendations for their business processes to set the organization up for future success.

Solution: Apparo matched Restore Global to a volunteer team from Jabian Consulting who documented their business processes and made recommendations for improvement.

Nonprofit Team: Steven Wray and Joyce Ford

Volunteers: Gokhan Guley, Rebecca Martin, Courtney Ramey, Allison Stunja

Delivering 80% more in one year alone

The new process mapping delivered by Jabian has improved organizational effectiveness and freed critical bandwidth for Restore Global leadership to pursue new partnerships and take on significant additional growth.

As a result they are on track to:

- Increase assets delivered to nonprofits by 80% this year (growing from \$14 million to \$25 million)
- Meet or beat their goal of delivering \$100 million in assets to nonprofits annually by 2023

BANK OF AMERICA

"My time has opened up because I'm not dealing with day-to-day operations and processes as much anymore. The effectiveness and execution of our programs is much greater than it was and that allows me to spend more time expanding, growing and accepting more assets and new partnerships. Nonprofits have a critical need for our support. Our growth makes a real difference in people's lives." - Steven Wray, President/CEO, Restore Global
